24th of February 2019.

Dear Graduate Admission Committee Members,

It is my pleasure to recommend Alaska Lovald for your LLM Information Technology Law programme.

I first encountered Alaska in my capacity as primary lecturer for both the Masters-level Enterprise Cyber Security course and Cyber System Forensics course. Alaska was a dedicated and diligent individual that regularly participated in class and regularly steered class activities and discussions. In my opinion, Alaska is a diligent and dedicated individual that strives to deliver high-quality and rigorous work.

I know Alaska will be a worthy addition and make a valuable contribution to your programme. I am confident your postgraduate programme will empower her to make a significant and lasting contribution to society.

Best regards,

Joseph Maguire
